

**We are reaching out to let you know that we've refreshed our brand from
Caring Mobile Dental to ...**

Same clinicians, same support staff, same high-quality care - simply a refreshed brand and name that speaks to our bigger vision of enabling dental care to in-need populations. There will be no interruption with existing patients from a clinical or administrative perspective.

Why are we updating the brand? We think the new logo speaks to the mobility of our services and to our mission of serving in-need populations.

We've also been asked by our more than 500 trusted referral partners to have one brand across all our operations and the demand for a single quality dental provider increases. We have seen a massive increase in demand for our services. The best communities are proactively identifying top partners like Enable Dental to provide even more services on-site (across the entire spectrum of care from independent living all the way to skilled nursing).

Thank you for your support and we hope to get you through this unprecedented time with convenient, quality dental care for your patients, community, or loved ones.
